Los Angeles, CA | (213) 258-9391 | prathamj.2025@gmail.com | [LinkedIn](#)

EDUCATION

University of Southern California (USC), Viterbi School of Engineering

Aug 2025 - May 2027

Master of Science, Engineering Management

Los Angeles, CA

- **Coursework:** Engineering Project Management, Engineering Management of System Integration, Economic Analysis of Engineering Projects, Leading and Managing Engineering Teams

Lakshmi Narain College of Technology and Science

Aug 2018 - Jun 2022

Bachelor of Technology, Computer Science & Engineering

Bhopal, India

SKILLS

- **Product Management & Strategy:** Feature Roadmapping, Product Discovery, Product Strategy, Market Analysis, Requirement Analysis, Sprint Planning, Backlog Management, KPI Tracking, Data-Driven Decision-Making, Agile & Waterfall Methodologies, Cross-functional Collaboration, Stakeholder Management, Risk & Issue Management, Process Optimization
- **Tools & Technologies:** Jira, Confluence, MS Project, Microsoft Office Suite (Excel, PowerPoint, Word), Google Workspace, Smartsheet, Python, SQL, Google Dialogflow, NVIDIA ACE Agent, Power BI, Tableau, Asana

EXPERIENCE

Quantiphi

Aug 2022 - Jul 2025

Senior Conversational Bot Engineer

Mumbai, India

- Defined the feature roadmap and milestones for three multilingual conversational AI agents (two digital-human avatars and one chatbot), managing scope, KPIs, and success metrics, and ensuring on-time delivery by coordinating backlog management and sprint planning
- Conducted user research and product discovery to define success criteria and feature requirements for a RAG-powered digital shopping assistant, validated the solution through a 4-week pilot, and showcased the agent at NVIDIA GTC 2024 with a projected +25% conversion uplift
- Translated BRDs into epics and user stories with acceptance criteria using agile methodologies, performed requirement analysis on call-flow workflows to identify pain points, and built bilingual (English/Spanish) voice bots using Dialogflow CX with Datastores and BigQuery, reducing L1 workload by 40%
- Ran weekly status meetings and executive readouts leveraging Jira dashboards and Smartsheet timelines, and fostered cross-functional collaboration and stakeholder management that accelerated product iteration by 20%
- Coordinated APAC/AMER product deployments using RACI matrices and readiness checklists to deliver AI solutions across retail, telecom, and healthcare clients, ensuring on-time delivery across all regional launches
- Managed risk logs and release quality criteria across three AI product launches, coordinating quality reviews and defect tracking that reduced defect leakage by 23% and improved product reliability
- Designed and deployed an LLM intent classifier (96% micro-F1), optimized services in cloud environments to cut p95 latency by 25%, and validated prod-parity environments for reliable releases

Persistent Systems

Dec 2021 - Jun 2022

Salesforce Developer Intern

Nagpur, India

- Developed and configured Salesforce CRM components for a banking project, applying platform customization, APIs integration, and software architecture principles to meet defined technical specifications
- Converted functional requirements into user stories and testable acceptance criteria in Jira, managed backlog and tracked delivery milestones, and communicated stakeholder updates to keep a financial-services project aligned to scope and timeline

PROJECTS

Smart USC Event Ticketing & Crowd Management System

- Gathered stakeholder and attendee requirements, translated them into user stories, and identified entry bottlenecks during large-scale campus events-proposing ID verification, facial recognition, and dynamic gate allocation to reduce verification effort by 40%
- Used a weighted decision framework to evaluate solution tradeoffs, then defined the MVP scope, backlog priorities, and acceptance criteria to balance speed, security, scalability, and implementation complexity

Trojan Home: USC Housing Mobile Application

- Led product discovery and translated user needs into prioritized user stories for housing search, roommate matching, and marketplace features-ensuring clear acceptance criteria and grooming the backlog in Jira
- Created a feature roadmap with milestone dependencies, defined KPIs to measure success, and ran sprint planning sessions to align scope, timeline, and stakeholder expectations
